

\$DIMON Whitepaper: The Roast Report

Subtitle: No Roadmap. Only Rage. One Token to Burn the Banks.

Disclaimers: This is a satirical crypto project. It is not financial advice, and it is not affiliated with JPMorgan Chase or Jamie Dimon. Always DYOR before investing in any token, including \$DIMON.

1. Executive Summary

\$DIMON is a decentralized meme coin created in direct response to years of anti-crypto rhetoric from JPMorgan CEO Jamie Dimon. While banks profit off fees and centralized control, \$DIMON empowers holders to take back value through humor, decentralization, and community ownership. Every transaction is a meme-powered protest against legacy finance and the banking elite that laughed at crypto — until it outgrew them.

2. The Origin Story

Jamie Dimon famously called Bitcoin a "fraud," dismissed crypto as a "waste of time," and continued pushing centralized banking while JPMorgan quietly built its own blockchain assets. \$DIMON flips that narrative — turning his FUD into fuel. We didn't wait for permission. We minted poetic payback. \$DIMON exists so Jamie Dimon never forgets the future he tried to deny.

3. Mission & Vision

Mission:

To use satire and community to expose the absurdity of traditional banking, while building a zero-tax, decentralized token with real meme power.

Vision:

A future where humor beats fees, memes outperform savings accounts, and decentralized communities write the rules — not billionaires.
